

# PAPER FASTENER CUTOUTS

## Artsy Craftsy Idea

No brass brads on hand? No problem!

### DIRECTIONS:

- Print this page onto heavy-duty white card stock.
- Cut one paper fastener at a time along the outside edge of the solid black lines.
- Fold the red dotted lines adjacent to the circle back towards the center of the circle.
- Fold the second red dotted lines away from the circle.
- Make a small cut into each layer of paper that you wish to fasten together.
- Thread the pointed end of the fastener through all the layers of paper.
- Do not thread beyond the small folded squares below the circle.
- Tape the 'wings' of the fastener down to the bottom layer of paper.
